

WHITE-PAPER

Background and Description

A basic introduction into the 909Coin!

What is the 909Coin? How was it inspired? Why was it developed? These are the questions that many of you may be asking. In short, the 909Coin was inspired by one of the many high staking coins. (For example the Drum Machine coin we all know) is a cryptocurrency. Users are able to generate that coin through the process of mining. For some time our founder ScottLaRock has been an investor of that high staking coin. He has always been amazed by the number of people that support this coin with no real use case.

For himself, the draw has been a few things the staking ability, the large overall supply, and the affordable price of it. He believes many others have been drawn to this coin for these reasons as well. When he was looking for a great promotional tool to gain exposure for private projects and partner projects, that high staking coin was the perfect choice. Not only does that high staking coin have all these great qualities, the coin has been very popular on many exchanges creating one of the largest trading volumes on each exchange it was listed on. For anyone that pays attention to numbers, this coin has always stuck out for attention. There are also many hodlers of this coin.

The shocking news is, that coin has no real development team in place currently. Please understand having an active development team is very key to the success of any project. Many crypto projects have died over night because the team has abandoned the project for one reason or another.

Not having a development team has caused many issues for many projects, not just for that coin. One issue that often rises is that the block-chain of the project coin will be taken over by others not attached to the project. Once these ninjas as he named them see an opening, they take control of the chain. Causing a fork in the chain for their own benefit with no consideration for the investors that came before them. All those investors find that they lose all rewards from any coins that they may be staking. This causes the chain to become very unstable causing exchanges to delist the coin because the exchange cannot maintain the wallet for a listed coin that has been forked.

Even though it is thought that it could be a goldmine, the work needed to continue this project would be an immense undertaking especially without any control of the project and the chain. Making a very hard decision to move away from the promotion of that coin, having many users of it's associated bot to take in consideration, the final decision was made to create a new coin entirely with some similarities but with a fully upgraded algorithm and script. ***909Coin came into fruition.***

909Coin will have several use-cases, not to mention a powerful team working very hard to push the project forward. 909Coin will be a true community coin. It will be controlled by the community from the beginning and always. 909Coin investors will not have to worry about the pre-mine being dumped on the market once it reaches a good price. From the very beginning we have taken steps to ensure that 909Coin is not controlled by a select few.

The plan for 909Coin is unique and has never been attempted by any project. I will elaborate more on this as we progress through this white paper. This will be very exciting to attempt, succeed and once fully understood will be ground breaking for crypto.

909Coin Scope of Use

So, let's take a look at some of the use cases planned for 909Coin. Remember 909Coin is a community coin first and foremost. The direction of this coin will always depend on the community that invests in it. Many projects and businesses forget who have brought them to being successful. It is the investor that has spent his hard-earned money and believed in the project that has made any project a success and should have a say in the direction if possible.

From the very start, 909Coin will take over the spot of that drum machine coin as a promotional tool to generate activity in several discord servers. The use of the rain bot, which is currently in over 50 plus servers with over 16,000 users. ScottLaRock has coined the use of this bot "Thunder". "The Booom", for short! Lol. The "thunder storms" have been a great way for potential investors and community members to earn free coins. Once converted over to 909-bot or whatever is decided to be labeled as, It will also allow the observant staking ability of 909Coin. These potential investors will learn about the full project and the amazing team behind it. Not only will "We" be doing all the promotion, "We" will also use 909 to help give exposure to long time partners of our previous projects. As 909Coin grows, our partners will grow as well. Teamwork, networking and giving back is the staples of our mission. With the advantages of meeting so many talented people along the way our founder ScottLaRock would never be as influential as he is now.

Plans are in place to donate a set amount of the 909Coin pre-mined coins to each partner. This donation should be used for the community rain in that server. As the 909 Coin popularity grows, "We" (partners and founder), will work towards using the 909coin as a payment method for tangible goods such as merchandise, tipping for services and much more. All this is dependent on what direction the 909 board members and community choose to take as 909Coin is a true community coin in every aspect.

High-Level Requirements

You may be asking what is a 909Coin board member? How do I become a 909Coin board member? Let me give you a brief description here. A more detailed explanation will be released at a later date once more aspects are implemented.

First we must look at the specs of the 909Coin to understand how the board member concept came to life. A few things need to be explained.

909Coin Supply:

- Maximum Coin Supply: 909,000,000,000,000 (909 T) T stands for trillion
- Pre-mine: 909,000,000,000 (909 B) B stands for billion

The letter assignments are for differentiating what is whole and what is pre-mine

909Coin has a huge Maximum coin supply of 909 Trillion. Why? 909Coin was built for the masses and a coin that everyone can own once cryptocurrency reaches mass adoption. Everyone will be able to use 909Coin without fear of it skyrocketing in price over night. Basically, you could buy a cup a coffee with it if you choose to and easily replace it without a problem. With over 8 billion people in the world and growing it seemed to be a good number that would allow everyone to own some 909Coin.

It is well known that many projects with a huge max capacity have not survived. Many opinions express the reasoning of these failures. Either the price dropped so low or the use-case was not set in place correctly, causing investors and supporters distancing themselves from the project, leading to the coin losing interest with eventual delisting from exchanges.

In any business, hard work is needed to become successful. The magic will not happen unless this is executed on a daily basis. Many projects have given up because it's so hard to maintain and much easier to move on to something new and start over fresh. Unfortunately, we all have seen this time and time again as well as seen some projects have a few setbacks giving up before the full potential has been reached. That previous coin mentioned is a prime example. It is unique because it lasted longer than most, why? Well even with no use-case, no strong team in place, it was still popular with many investors around the world. There is something to be said about large numbers with the past successes of this coin and its high-stake rewards. Many investors have Millions or even Billions of this coin even though the value is not there. They Love this coin and still want more. After evaluating this occurrence, it was decided to create a similar huge number for the Maximum Coin Supply and Pre-mine.

The next problem seen over and over with Crypto projects is the use of the Dev Pre-mine. This pre-mine ends up on the market way to early causing the price of the project coin to "dump" and many times it never recovers. Investors loose again with the project never reaching its full potential. What can we do different with this project so that this does not happen? Thought put in at great lengths were evaluated to ensure that 909 cannot be used to "dump" the market. Even though there is a large pre-mine of 909 billion coins, these coins will be secured in a way to benefit our investors and community. This concept has been deemed, "THE 909 VAULT". The "VAULT" is made up of many different assets and run by the 909 board and community which each have a Billion of Pre-mined of 909 Coins.

At the start of this project, 500 Billion coins will be locked in the vault. This locked deposit will become and remain the largest wallet of the 909 project. There will be 909 board members assigned to the vault at specific times over 5 years. In the first year 101 members will secure a position on the board and will also earn extra power moving forward as the project grows. This first group will remain the strongest and will have more responsibilities and weight as decisions go with the direction of the project. The first 101 spots are early adopters, basically the 909 OG's. Our first year will be the only time 101 members will earn a spot. The following next four years will see 202 spots open up of 101 spots twice a year.

Example below:

Year 1

- July 4th 2019 - July 4th 2020 101 board members

Year 2

- July 4th 2020 - Jan 4th 2021 101 board members
- Jan 4th 2021-July 2021 101 board members

Year 3

- July 4th 2021 - Jan 4th 2022 101 board members
- Jan 4th 2022-July 2022 101 board members

Year 4

- July 4th 2022 - Jan 4th 2023 101 board members
- Jan 4th 2023-July 2023 101 board members

Year 5

- July 4th 2023 - Jan 4th 2024 101 board members
- Jan 4th 2024-July 2024 101 board members

Ability to incorporate automated routing and notifications based on business rules

909 Coin Deliverables

Why would you want to be a member of the 909 board?

500 Billion 909 Coins will be locked up in what is called “The 909 Vault”. The “Vault” will be generating the largest stakes. On a monthly basis stakes of the 909 wallet, will be figured out. Once the final balance is determined, 1/2 of that balance will be sent to each member of the board equally. The other half of the balance will go into investments determined by the board. The goal of the “Vault” will be to reach 909 crypto project investments and a nice passive monthly income for all those involved. Once each investment is secured, it will also be “Vaulted”. Of course, BTC will be a major investment of the vault, along with other major coins. The vault will also move to invest in partner’s projects. This will also need board approval. Helping our partners is very important to the success of the 909Coin project. If more projects work together, they will become stronger and everyone will win especially our investors. Board members will make all decisions dealing with the vault at all times by process of vote. Meetings will happen on a regular basis so that all members stay informed. Board member roles will also be assigned within the 909 server and private channels created for important information.

The 909 Coin Board Member

How to become a 909 Coin board member?

Anyone can become a member on the board, but the spots will fill up fast and are very limited. Each spot in the first year will take a collateral of 1 billion 909 coins to join the 909 Coin board. In the years following the spots will go into an “Auction” style setting as we have no idea what the market may be. Once a member has acquired the 1 billion coins needed to secure a spot during the first year, those coins will also be vaulted increasing the staking power of the vault and the rewards to all the board members. After every position of the vault is filled, the first year a total of 601 billion coins will be vaulted. After each person secures that spot in the vault, it is their asset to own. It can be sold, auctioned, or given away. Each spot will have a smart contract attached to identify the ownership. If the member chooses to leave the vault, the 1 billion coins will be returned to that member once the smart contract has been transferred and everything has been approved by the board. Vault board members take ownership of that position. The spot will be auctioned off with funds going directly into vault and the new member will take that position. Movement of positions can only take place on the first day of each month or the last day of the month. This is done to not upset the cycle of rewards for all board members.

There are a couple other ways to become a board member of 909 Coin. First method is to be a major contributor to the 909 project and put in the time and effort as a team member. Another method is to be a very active community member that proves themselves to team members of 909.

909 Coin Specifications

- Name: 909Coin
- Ticker: 909
- Algorithm: POS / POW (Script)
- Maximum Supply: 909,000,000,000,000 (909T)
- Pre-mine: 909,000,000,000 (909B)
- Block Time: 90.9 Seconds
- PoS percentage: 909% APR
- Minimum PoS Age: 90 hours and 9 minutes
- Transaction Fee: 100
- Maturity: 30 blocks

Comparison table with other successful crypto currencies

	EOS (EOS)	Stellar (XLM)	Fibercoin (FBC)	909coin (909)
Circulating supply	906 million	18 billion	560,000	909 billion
Maximum supply	No upper limit	No upper limit	320 million	909 Trillion
Current mining/release rate	Up to 5% increase per year	Up to 1% increase per year	Up to 114% increase per year	Up to 909% increase per year
Transactions per second (maximum)	2800	1000	100	909
Block time (approximate)	0.5 seconds	5 seconds	114 seconds	90.9 seconds

Pre-mine breakdown

- 55% 500 Billion to 909 Vault (largest 909 Coin wallet in project)
- 25% 225 Billion to 909 team, marketing, promotion, exchange and listing future investments
- 10% 90 billion to 909 Dev team
- 5.5% 50 billion to bot users/808 holders
- 4.5% 45 billion to rain/909 partner giveaway

Road Map

June 2019

- Idea was born
- Team is formed

July 2019

- 909 Coin Release
- 909 Bot Development
- 909 Airdrops for 808-bot holders
- Basic coin info - Website, Explorer, Social Medias
- Roadmap

August 2019

- Pre-Sale/Auction of 10/20 909 Club Members
- Member # ID - Smart Contract Marble Card
- Exchanges
- Proof of Concept - 909 Vault
- Initial Investments

Sept 2019

- Continue Investments
- 909 Vault Website Development
- First payment of vaulted coins' stakes
- Assignment of current member responsibilities

Oct 2019

- Whitepaper
- Begin leverage negotiations for alignment of 909 for goods and services
- Continue and prepare for assignment of new board members

Nov 2019

- Implement partner's projects to be vaulted
- First member vote for which projects to consider

Dec 2019

- Vault those first projects, should be made up of first board members projects they lead

Jan 2020

- Begin votes for consideration next phase of board fulfillment

Roadmap is subject to change
